

Daily Doga *Inspirations for you and your dog*

Feeding our dogs with love, not hurry.

How often do we take our dogs food bowls, fill them, and throw them on the floor? Without judgment, haste or guilt, consider using feeding time as connecting and teaching time.

Dogs wait patiently to be with us and be fed, although it may not seem that way at times. Consider that if you feed your dog 2X a day, you have 14X training and connecting opportunities every week.

It doesn't have to last long. It takes a few moments of our time. It creates a trusting and lasting relationship with respect. Wait – please, sit-please, down-please, thank you here is a kibble or piece of nutrition, handed to you with caring and love.
